

2019-2020 EPSF Classroom Grant Program- Hillrise Wish Request

School	Grant Name	Description	Requestor	Grade	Amount
Hillrise Elementary	<u>ClearTouch Interactive Panel</u>	<p>My reason for submitting a proposal for new classroom technology is due to my current SMARTboard technology not working effectively. Several people have attempted to correct the issues, and it has worked temporarily, but then it quits working again. They have replaced parts of it as well, but the fixes have not lasted longer than a couple weeks. The suggested replacement for the projector is the ClearTouch Panel - 70"- 6070U. Replacing the projector would allow my instruction to be relevant to the needs of students, and allow them the opportunity to experience all of the curriculum components. With updated technology, my goal is to continue to present the curriculum, but with enhanced engagement opportunities for students.</p>	Melissa Mehlmann	5th	\$4,200
Hillrise Elementary	<u>Interactive Clear Touch Panel for classroom</u>	<p>At the beginning of the 2018-19 school year our classroom Smart Board broke. We received an older model Smart Board from district storage. The Smart Board we are currently using does not allow the students to interact with all of the technology in the new reading series and many of the other technology programs we use daily are not projected correctly on the older model or require students to interact on the teacher computer instead of on the Smart Board. We would like to be able to utilize all of the technology programs associated with our district kindergarten curriculum and allow the students to interact with it themselves on the larger visual board. We use our Smart Board daily across all curricular areas. The students would benefit from more opportunities to interact in a hands on way with the new technology. They love to write letters, spell words, sequence stories, create sentences and work math problems on the Smart Board.</p>	Deb Thomas	K	\$4,200
Hillrise Elementary	<u>Document Camera Upgrade</u>	<p>Funds from this grant will be used to purchase an AVerVision M70 document camera. This technology has the capacity to be used in any classroom environment with any subject area. Document cameras are able to capture images and store these on the camera itself. These files can then be reviewed any time during the lesson. The purpose of this project is to provide more methods to easily make resources accessible. This technology allows students to share work examples, diagrams, reflections with the entire class by placing the document under the camera. It can also be used as an accommodation for students with visual impairments. One feature allows the teacher to enlarge the object that is placed on the document camera. All students would benefit from the daily use of the document camera in the classroom.</p>	Brittani Fisher	2nd	\$400
Hillrise Elementary	<u>TECHing Students</u>	<p>I am writing this in preparation for Hillrise growth. Funds from this grant will be used to purchase an AVerVision M70 document camera. This technology has the capacity to be used in any classroom environment with any subject area. Document cameras are able to capture images and store these on the camera itself. These files can then be reviewed any time during the lesson. The purpose of this project is to provide more methods to easily make resources accessible. This technology allows students to share work examples, diagrams, reflections with the entire class by placing the document under the camera. It can also be used as an accommodation for students with visual impairments. One feature allows the teacher to enlarge the object that is placed on the document camera. All students would benefit from the daily use of the document camera in the classroom.</p>	Lindsay Kellams	3rd	\$400
